

## CHAPTER V

### CONCLUSIONS AND RECOMMENDATIONS

#### 5.1 Conclusions

The code-switching phenomenon found in the Deddy Corbuzier Podcast was representative evidence that code-switching can be found in everyday social life. The code-switching phenomenon found in the Deddy Corbuzier Podcast was then compiled into data that was categorized according to the theory used by the researcher. The theories used are the ones explained by Poplack (1980) about the types of code-switching and the ones explained by Hoffmann (1991) about the reasons for using code-switching. Then, Poplack (1980) divided the types of code-switching into three parts: tag-switching, inter-sentential switching, and intra-sentential switching. On the other hand, Hoffmann (1991) classified the reasons for using code-switching into: talking about a specific topic, quoting somebody else, showing empathy about something, interjection, repetition used for clarification, intention of clarifying the speech content for the interlocutor, and expressing group identity.

Based on the data found about code-switching on the Deddy Corbuzier Podcast, the most type of code-switching used on that podcast is intra-sentential switching. Meanwhile, the most common reason for using code-switching is talking about a specific topic. So, it can be concluded that the presenter and the two guests in the video analyzed by the researcher are bilingual people who are able to communicate using more than one language.

## 5.2 Recommendations

The researcher recommends society regarding the use of code-switching. People who use code-switching mostly work for entertainment field, such as public figures. They used code-switching to get a validation for the existence, get more attention and show their intelligence. Indirectly, it has an impact to the society through their existence on social media. In other words, public figures can use more than one languages to communicate with the interlocutors in order to show their popularity as people who can influence or impact society. Even code-switching can help a person become fluent in using a foreign language.

Using code-switching in everyday life can provide several benefits for users. These benefits include things such as being able to hone your ability to learn a foreign language. It also helps a person get along more easily in certain environments. In connection with this research, the researcher hopes that this research can be useful for readers and be able to apply code-switching in everyday life. So, the readers can get the benefits that the researchers have mentioned.
