ABSTRAK

Fenomena gangguan berbahasa khususnya *Autism Spectrum Disorders* masih sering dijumpai di masyarakat. Penyandang *Autism Spectrum Disorders (ASDs)* mengalami kesulitan dalam berinteraksi dan berkomunikasi, selain itu mereka juga memiliki keterbatasan dalam perilaku dan minat. Permasalahan yang ditemukan peneliti di lapangan adalah masih banyak masyarakat yang masih belum mengetahui tentang jenis-jenis gangguan bahasa dan apa saja macam-macam respon autis yang diberikan oleh penyandang gangguan autisme. Oleh karena itu, tujuan dari penelitian ini adalah untuk mengetahui jenis-jenis gangguan bahasa dan macam-macam respon autis yang diberikan oleh tokoh utama dalam "*The Good Doctor*" series. Teori yang digunakan dalam penelitian ini adalah teori tentang jenis gangguan bahasa oleh Field (2003) dan Carroll (1985) dan tanggapan autis oleh Rothwell (2000). Dalam melakukan penelitian ini, peneliti menggunakan penelitian kualitatif deskriptif yang dikemukakan oleh Abbot dan McKinney (2013) Penelitian ini menggunakan metode observasional menurut Sudaryanto (2015) dan untuk mengumpulkan data menggunakan teknik non-partisipatif. Peneliti menemukan 58 data yang berhubungan dengan tipe gangguan bahasa yang diambil dari respon pemeran utama dalam "*The Good Doctor*" series. Peneliti menemukan bahwa pemeran utama dalam "*The Good Doctor*" series memiliki kedua tipe gangguan bahasa. Namun, tipe yang paling dominan adalah gangguan bahasa reseptif dengan jumlah data sebanyak 30. Lalu, peneliti juga menemukan 63 data yang berhubungan dengan macam-macam respon autis yang diberikan oleh pemeran utama dalam "*The Good Doctor*" series. Peneliti menemukan bahwa macam-macam respon autis yang paling sering diberikan oleh pemeran utama adalah tanggapan yang relevan secara kognitif dengan jumlah data sebanyak 33.

Kata kunci: Gangguan bahasa, Psikolinguistik, Respon-respon autis.

ABSTRACT

The phenomenon of language disorder, especially Autism Spectrum Disorders, was still often found in society. People with Autism Spectrum Disorders (ASDs) experienced difficulties in interacting and communicating, besides that they also had limitations in behavior and interests. The problem found by researcher in the field were that there were still many people who still did not know about the types of language disorders and what kinds of autistic responses were given by people with autism disorder. Therefore, the purpose of this study were to find out the types of language disorder and what kinds of autistic responses given by the main character in “The Good Doctor” series. The theories that used in this research were the theories about the type of language disorder by Field (2003) and Carroll (1985) and the autistic responses by Rothwell (2000). In doing this research, the researcher used descriptive qualitative research proposed by (Abbot, 2013). This research used the observational method by Sudaryanto (2015) and to collect the data used non-participatory techniques. Researcher found 58 data related to the types of language disorders taken from the responses of the main characters in "The Good Doctor" series. The researcher found that the main character in “The Good Doctor” series had both types of language disorders. However, the most dominant type was receptive language disorder with a total of 30 data. Then, the researcher also found 63 data related to kinds autistic responses given by the main character in "The Good Doctor" series. The researcher found that the kinds of autistic responses that were most often given by the main character were cognitively relevant responses with a total of 33 data.
