

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

In this chapter, the research conclusion and suggestion are presented with the relation of the research analysis and findings from previous chapter. The conclusion contains the summary of language style types and language functions analysis and findings in “Soul” Movie, and the suggestion is the recommendation for the future research of language style.

5.1. Conclusions

The research analysis and findings result of language style found in “Soul” Movie applies the theory by Joos (1976), and it shows the five language styles are found with total data of 33 utterances. In detail, frozen style is 1 data, formal style is 1 data, consultative style is 7 data, casual style is 18 data, and intimate style is 6 data. The conclusion of the analysis is that frozen style which is the most formal style, and formal language style are seldom applied by the characters in “Soul” Movie because there are not many formal situations performed in this animation genre movie. While casual style as informal style is mostly applied by the characters in “Soul” Movie because the characters are often performed conversations in informal situations, also this animation genre movie more focuses to the daily casual life situations.

On the other hand, language functions which analyzed by theory of Jakobson (1980) shows that 6 functions of language are found in “Soul” Movie with total data of 17 utterances. The details of the 17 utterances show emotive

function has 6 data, conative function has 4 data, phatic function has 3 data, referential function has 1 data, metalingual function has 1 data, and poetic function has 2 data. It can be concluded that referential function and metalingual function are seldom applied by characters in “Soul” Movie because there are not many conversations discussing about general facts and language itself, while emotive function is found the most because the characters in “Soul” Movie often expressing their feeling and ideas in the conversation.

5.2. Suggestions

After the researcher finishes the analysis of language style found in “Soul” Movie, the researcher expects this research can be used as references by future researchers, lecturers, or students to have deeper understanding about language styles. The researcher also hopes this research can be used for guiding people to understand when to use most formal to informal language styles in society. Besides of those, there are some suggestions that researcher provides for future researchers. First, the researcher suggests the next researcher to analyze Sociolinguistics study with different topics of study. Second, the researcher also suggests the next researcher to conduct a study of language style from different data sources such as other movies, novels, advertisements, or social media. Last, the researcher suggests the next researcher to analyze language style by using other theory such as Chaika’s theory.
