CHAPTER V

CONCLUSIONS AND RECOMMENDATIONS

5.1   Conclusions

This research analyzed the acts of assertive. Spider-man No Way Home movie was the data source used in this research. The utterances were spoken by characters in the movie as the data analysis. Based on the findings, the aim of this research is to find out the acts of assertive and the functions of assertive acts.

Informing act was the most frequently uttered by the characters in "Spider-Man No Way Home" movie. It was followed by the collaborative function that appeared the most. The characters were more for the social goal of conveying information to the interlocutors. The phenomena succeeded if the speaker or the hearer received the cause and effect. The phenomena were not only uttered by the hearer as the one who got the effect but also uttered by the speaker. The utterance occurred because it was based on a situation that caused the speaker to express or utter the statement.

5.2   Recommendations

Following certain conclusions, the researcher makes some recommendations that may be helpful for the following researchers, particularly for those who desire to do research with a pragmatic approach. This research focused on analyzing the acts of assertive and the functions of assertive acts. The researcher

recommends not only using the theories of this research but also using other theories related to pragmatics.

Further researchers should explore more research on the acts of assertive because this research is only a small part that discusses speech acts. The researcher hopes that this research can be used as a bit of reference to develop broader research on speech acts. In addition, future researchers who take the same approach can conduct this research by taking the data directly in the field.
