

CHAPTER V

CONCLUSION AND RECOMMENDATIONS

5.1 Conclusion

The result brings to light 34 utterances found in movie Luca that serve two purposes. Firstly, there are 5 types of directive illocutionary acts found in Luca movie, namely command, orders, requests, suggestions, and advice. The researcher takes a conclusion based on the result of the research. The researcher can found all the types of directive speech act in the “Luca” movie. Based on the findings, the researcher takes a conclusion that in “Luca” movie, the characters was mostly has the same level of power. The dialogue also made in informal environment. These conclusion were drawn because the findings of the research shows that order is the types of directive speech act that occurs the most during the movie.

Furthermore, the second purpose is to answer the second question. The second question is the form of the speech act. The researcher found that all the forms of speech act can be found in the “Luca” movie. The most dominant form is imperative sentence. This is because the directive speech act is asking or telling the hearer to do something.

5.2 Recommendation

The researcher would like to recommend to the students who are interested in taking directive speech act as their research. Firstly the researcher needs to understand fully about the approach that will be used. Second to that, the researcher could try different types of data source in conducting their research. They can also tried use different genre of a movie then make a comparison to see whether different genre would show a different result. Lastly, the researcher should be careful in identifying the types of directive acts because the act does not have lot of differences between each types of the directive speech act.

The researcher would like to recommend the reader to practice the directive speech acts in their daily life. From that, they can see how the hearer

reacts toward each of the types of directive act. Therefore, they can experienced and then decide which types are appropriate in specific situations. The advantages of studying speech act are that it can be easily practiced in our daily life. Thus, the reader could experience first-hand the usage of the speech act.
