CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusions

The using of language style in a social media Couchsurfing is one of the phenomena found in daily society communication. The using of language style in a social media Couchsurfing refers to a theory of language style proposed by (Joos 1967) that already explained in the second chapter of this research. The using of language style in a social media Couchsurfing proved by collecting data that are taken from the private conversation in a social media Couchsurfing.

Based on the research analysis and findings which is about language style used by adults in Couchsurfing, there are two main conclusions that can be drawn. First, the use of casual and intimate language style, casual language style characterised by the using of of words/phrases that are shortened. Besides, intimate language style characterised by the using of intimacy meaning, jargon or the code, and extraction or the minimum pattern of word.

Second, the reason for the Couchsurfing members in choosing casual or intimate langugae style. Casual language style used with a reason to find a new friends in the place that the sender wants to visit. Besides, intimate language style used in a social media Couchsurfing with a reason to be accepted in the receiver circles. In the other words, The sender used intimate language style is intentional because in Couchsurfing most of the members are the people who don't know to each other yet.

5.2. Suggestions

The using of language style is the phenomenon which can be found in every kind of communication. The result of this research does not cover all of the kind language styles. There are still many cases on the study of language style that is still needed to be conducted and studied from different perspective. However, this research still far from the complete one, but by this research, at least it can be known the language styles used in a social media Couchsurfing.

Hopefully, criticisms and suggestions will rise from the reader to gain the better researcher in the future. Here, the researcher would like to suggest some points related with the subject of the research.

1. To the readers, hopefully the readers can choose the style of language proportionally to be used in a communication.

2. To the students, especially English department, they can understand the types of language styles, especially in using language style in social media not only in Couchsurfing. Furthermore, it can improve their skill in English language. It is because English language broadly used in all parts of the world and become an international language so the understanding of English language is needed.

3. To the other researchers who would like to conduct the same research could complete this research not only about the kinds of language style used and how they used the language style, but the researcher expects to the other researcher to take different object of the research.
