

## **CHAPTER V**

### **CONCLUSIONS AND SUGGESTIONS**

#### **5.1 Conclusions**

As the closing of this research, the researcher is going to take conclusions that: (a) Phenomenon of the functions and factors are found in the utterances of the movie *Laskar Pelangi*. (b) The use of speech act classifications and the factors are related to the theories mentioned in advance. (c). The use of speech act classifications functions and the factors which influence the speech become fail are proven by collecting the data related to the objects and analyzing deeply in order to conclude as the following mentioned; (1) The general of speech act classifications found are 3 types different functions, they are: directives, representative and expressives. (2) The factors which influence the speech become fail are the interlocutor is not interested, does not understand, unwelcoming, unconscious and the contexts.

#### **5.2 Sugestions**

The researcher suggest to the reader that in delivering the intention to the interlocutor the speaker, it should be meant by their functions and avoid the factors which could make the speech becomes fail. The researcher classifies this failure caused some factors. So, if these factors have been avoided, hopefully the intention will be successfully delivered to the interlocutor.

Hopefully another researchers could see new perspectives of the speech act classification and the factors which influence the speech from another aspects. He also hopes to the reader or other researcher that this study will be useful for future improvement of Pragmatic study, especially discuss about the speech act.
