

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusions

The using of code mixing in meme on Instagram is one of the phenomena found in the status of youngster. Actually, the use of code mixing is not a new phenomenon in society either in social media or daily communication they often used code mixing for interaction to the others. The use code mixing also can be found in writing form, for example the case such the researcher have been analyzed the code mixing found in meme on Instagram that usually used as a status by youngsters. Based on the research in analysis and findings which is about the types and reasons of code mixing in meme on Instagram, there are two main conclusions can be drawn by the researcher.

5.1.1 The Types of Code Mixing found in Meme on Instagram.

Based on the research in analysis and findings, the researcher concludes that the type of code mixing they used is insertion type because they only inserted one foreign language and the word also is very familiar in society especially a youngster community. Because to express something they prefer used familiar words

5.1.2 The Reasons of Code Mixing found in Meme on Instagram

Based on the research in analysis and findings, the researcher concludes that the reason of meme's author inserted such the word in meme to the readers especially youngsters to make them comfortable to read the meme such as the words **Girls** replace the meaning of cewek, **War** refers to playing game activity and **Driver** (depends on the context) refers to tukang ojek etc, in a different perspective.

5.2 Suggestions

The using of code mixing is the phenomenon which can be found in every kind of communication activities, particularly in social media that used language to send the message and express the feeling, There are so many cases in the study of code mixing that is still needed to be conducted and studied from different perspective one of them we can found in meme, it is a kind of Image with the caption usually inserted more than one language, however this research still far from the complete one. The researcher hopes criticisms and suggestions will rise from the reader to gain the better researcher in the future.

Furthermore, the researcher hopes that the research can help others in exploring the subject so that they can study more about the Code mixing. Additionally, the finding of this study will be of value for the development of sociolinguistic.
