

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

In this section, researcher concluded that captions related to pictures. This research finding concludes two elements they are quantity and combination. Quantity includes the quantity of one letters or numbers is 2 data, the quantity of two letters or numbers is 6 data, the quantity of three letters or numbers is 6 data, the quantity of four letters or numbers is 7 data, the quantity of five letters or numbers is 5 data, and the last the quantity of many letters or numbers is 4 data. Then, combinations include the combinations of capital letters is 12 data, the combinations of letters and numbers is 4 data, combinations of numbers is 7 data, combinations of letters or numbers with punctuations is 5 data, and the last the combinations of numbers or letters in pronounce is 5 data.

Furthermore, it can be concluded that abbreviated slang words both in construction and meaning have diverse and widespread characteristics. This happens because these characteristics are mostly used by teenager and adolescents who want their captions to be simpler and look not outdated. In addition, abbreviated slang words phenomenon can be ambiguous and can be a boomerang for readers who do not understand about abbreviated slang words. The development of abbreviated slang words phenomenon cannot be avoided in daily life and social media especially

on Instagram. This is the reason why slang words phenomenon becomes an interesting object to be researched.

5.2 Suggestion

After conclusion section then arrived at the suggestion section, there are suggestions for both of the following parties. The first is to teenagers and adolescents, basically, abbreviated slang words gives positives and negatives impact. One of positive impact is abbreviated slang words makes teenagers and adolescents more creative in the use of language. For negative impact, abbreviated slang words can be annoying the readers due to difficulties for understanding the construction and meaning. In this case, the researcher hopes that the readers of abbreviated slang words find out the information about this phenomenon more deeply to improve understanding of language.

The second suggestion is to the next researchers who are interested for doing further research for abbreviated slang words phenomenon. The researcher suggests for observing in different social media not only on Instagram but also Facebook, Twitter, and chatting. In addition, the researcher suggests to next researcher for doing research about abbreviated slang words can show more many types of the data, constructions, and meanings about this phenomenon and more deeply.
