

CHAPTER V

CONCLUSION AND SUGGESTTION

5.1 Conclusion

Based on the result of the data, the researcher concluded that the sociolinguistic analysis of code mixing of employees at PT Maruwa Indonesia such as:

In conversation Skype by employees PT Maruwa Indonesia have found types code mixing, they are intra-sentential found 36 data and intra-lexical found 16 data. In conversation Skype by employees PT Maruwa Indonesia have found two reasons there are, talking about particular topic found 5 data, and repetition used for clarification found 4 data. In conversation Skype by employees PT Maruwa Indonesia utterance found that Indonesian language was dominating the conversation. It could be seen based on the domination of the types of code mixing (*intra-sentential*).

5.2 Suggestion

The researcher has some suggestions based on the conclusion above, such as:

1. The researcher hopes this paper can be used as a reference for the next researcher
2. The researcher hopes the next researcher will be more complex and effective by taking the other object as the data and more samples and theories

3. The researcher suggests employees more active to speak English language and they must learn English at least they know when the foreigners talking about something
