CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher want to make a conclusion and suggestion, the researcher make the conclusion and suggestion based on finding and discussion by Sandiaga Uno speech that the researcher analyzes.

5.1 Conclusion

This part will conclude and related with formulation problem about type and function of code switching based on the researcher analyzes.

5.1.1 Types of code switching

The analysis and finding of code switching reveal that the most or the higher percentage is inter sentential code switching with the percentage is 57% and total 20 excerpt that the researcher found it from three videos. Followed by intra sentential code switching with the percentage is 48% and total 17 excerpt and last emblematic or tag switching the researcher only found 2 excerpt and the percentage is 5 %. Based on this finding the researcher conclude that Sandiaga Uno always switch his language because his second language is English and he also switch in English to followed millennial generations because his want to support them for presidential candidate it's to become an entrepreneur and have high integrity.

5.1.2 Functions of code switching

The analysis and finding of code switching reveal that the most or the higher percentage is to provide emphasis about something and to repeat in order to clarify both of them has a same percentage is 17 % with the total 6 excerpt that the researcher found it from three videos. Followed by to expressing group identity with percentage 5% and the total 2 excerpt and to talk about particular topic both of them has a same percentage is 5% because there are found 2 excerpt. The last is to show intention of clarifying the speech content for interlocutor has a 2 % because is only found in 1 excerpt. There are has a 10 function but the researcher only find 5 function based on the researcher analyze and findings. Based on this finding the researcher conclude that Sandiaga Uno rarely to speak that have no grammatical rules. He always speak with a polite words and always repeated when he speaks in English to Indonesia.

5.2 Suggestion

Code switching always use in daily communication, especially in Indonesia. Because in Indonesia English is a foreign language and Indonesia is the first language, based on phenomena that English is the universal language in the world so almost people in the world mostly using English . Furthermore, the researcher hope that research in the field of sociolinguistics can continue to be sought after and cultivated professionally in order to provide knowledge and description of the phenomena of the use of language as a communication tool.
