CHAPTER V

CONCLUSIOS AND RECOMMENDATIONS

In this chapter, the researcher describes it into two categories, namely conclusions from the results of the research analysis that has been found in the House of Gucci movie 2021 and recommendations.

5.1 Conclusions

Based on the research analysis and findings in the previous chapter, the researcher concludes that there are 40 utterances in the movie "House of Gucci" which are included in the conversational implicature. There are 2 types of conversational implicature found in the movie, namely generalized conversational implicature, where the speaker or hearer is not required to have special knowledge to understand the meaning of the implicature and particularized conversational implicature, where the speaker or hearer must have special knowledge to understand the meaning of the implicature and by understanding the context. In which generalized conversational implicature found 35 data and particularized conversational implicature found 5 data.

The functions of conversational implicature can be divided into 4 maxims, namely maxim of quantity, maxim of quality, maxim of manner and maxim of relation. Which in the movie has found flouts of the maxim which will be sorted from the most data to the smallest, the first is a flout maxim of quality 16 data, the second is a flout maxim of manner 12 data, the third is a flout maxim of relation 11 data and the last flout maxim of quantity 1 data.

5.2 Recommendations

In this study, the researcher realized that research on conversational implicature entitled "Conversational Implicature in the House of Gucci Movie" still has many shortcomings. Therefore, the researcher would like to convey some recommendations that might be used by future researchers, especially for those who wish to research conversational implicature so that they can make their research better than before. Researchers want to provide some recommendations, namely:

1. For students, especially English Literature and English, they must really read and improve their knowledge of pragmatics, especially conversational implicatures because in general it looks easy but requires more knowledge to apply it.

2. For future researchers who are interested in pragmatics, especially about conversational implicatures and want to conduct research on research objects, they can use this research as a reference and it is hoped that researchers can further explore the characters in the movie so that it is easier to find out what the implied meaning is contained in the utterances in the movie.
