

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1 Conclusion

The failure in fulfilling the maxim principles does not mean that the people are failed to have a successful conversation, it all depends on the context that is happening. This likewise happened in “The Stranger Things” television series. The characters flouted the maxim in order to make the hearer understand their hidden meaning or their implicit intention. Based on the finding and analyzing, all types of the flouting maxim was found in “The Stranger Things” television series. From 30 data found, each including 7 data of the flouting maxim quantity type (23,33%), 4 data of the flouting maxim quality type (13,33%), 18 data of the flouting maxim relevance type (60,00%), and datum of the flouting maxim manner type (3,33%). Meanwhile, three of four functions appeared in flouting maxim. There are 5 data functioned as the competitive function (16,66%), 21 data functioned as the collaborative function (70,00%), and 4 data functioned as the conflictive function (13,33%). Besides of the data finding above, it was known that the type of the flouting maxim of relevance was the most closely related to the collaborative functioned in “The Stranger Things” television series. It can be seen from the 30 data that found, 15 data (50,00%) were the flouting maxim of relevance which functioned as the collaborative function. This is because the utterance that being relevantly flouted collaborated to the context happened in “The Stranger Things” television series. For

instance that when Nancy catch Michael, who was taking some money from her piggy bank, although Nancy asked about what Michael was doing he did not have to answer, because the context happened explained it to Nancy. It can be concluded that the characters in “The Stranger Things” television series used the flouting maxim that mostly collaborative to the context happened.

## **5.2 Suggestion**

For the future researchers who have any interest in conducting a research with the same topic, beside the types and functions, researcher suggested to be more aware in regarding any phenomena includes the flouting maxim. The used of the data source is also recommended for the further research, since “The Stranger Things” television series contained aspects related to other linguistic branched such as speech act, presupposition.
