

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1. Conclusion

Prior the 20th century, the majority of black Americans were subjected to various oppressions, including black women. Many writers in America have also participated in defending black women. Black women's resistance to oppression in novels has changed from passive avoidance to active resistance, which has essentially liberated their minds. Indeed at that time, black women could do nothing unless they could write a book to voice their opinion. Black women desire equality and the freedom to find responses to control the image. They must break the chain of thought through their own efforts. At the end of this book, Abelin and Minnie finally decided to publish an anonymous book about their life experiences with Skeeter. A form of stereotype, it will develop bad habits and make black people accustomed to daily life. Adapted to the silence, they could not find the right words to express their long-term frustration. Every step of breaking the document, the convention behind the accumulation is full of courage. However, it is better to show a defense of your dignity than to respond to anarchists.

Writing is a form of defense against their people. Prosecution for gender and social equality continues to be voiced through novels or newspapers. It was also the beginning of the struggle of black women to express their opinion and get their rights, from the experiences they had faced so far. This novel not only discusses racial discrimination, but also shows the social injustice experienced by black women.

This kind attitude sublimates the souls of the servants "To fight evil with evil" becomes "to stimulate good with good." As the card title indicates - Help, Kindness help them to support and help each other so that these brave women can finally fight a beautiful battle towards class oppression, racial discrimination, and gender discrimination. Help did not just work resistance to unfair treatment of black women in America, but also the search for identity, respect, and even the meaning of life, which is at the heart of Black Feminism.

## **5.2. Suggestion**

This study hopes to participate in the experiences gained, their preferences for equality, the feelings they feel when being bullied and the true true personality of black servants in such a social environment. They are a little weak but have some humble, some stubborn, but their characters are very charming, optimistic and courageous. In the face of oppression, they do not always leave traces of their evil attitudes nor do they feel hatred for them. On the other hand, they can travel quietly and freely without being disturbed by white people, live in peace with their destiny without having to require them to work, and want to be respected in their surroundings, and get a decent education.
